Gray's Inn
London WC1R 5JJ (GB)

(54) A network facsimile apparatus that transmits e-mail indicating transmission control information through a network

(57) A network facsimile apparatus, including a LAN interface unit, a facsimile interface unit, a memory unit, and a control unit, transmits image information received as e-mail through a computer network to another facsimile apparatus through a public channel, stores an e-mail address of a backup transmission destination with respect to the facsimile transmission in a memory unit for storing e-mail addresses beforehand. When the fac-

simile transmission is completed, the network facsimile apparatus generates communication control information and prepares an e-mail message that indicates the communication control information therein to transmit the e-mail message to the backup transmission address stored in the memory unit. Accordingly, a user can easily and readily ensure the result of the facsimile transmission by receiving the e-mail from the network facsimile apparatus.

FIG.1

**ANNEX TO THE EUROPEAN SEARCH REPORT
ON EUROPEAN PATENT APPLICATION NO.**

EP 02 25 4179

This annex lists the patent family members relating to the patent documents cited in the above-mentioned European search report.
The members are as contained in the European Patent Office EDP file on
The European Patent Office is in no way liable for these particulars which are merely given for the purpose of information.
